EXPERIENCE

ActBlue   August 2022 - Present
Software Engineer   *remote*

· Contributed to webhook systems and APIs for third-party developers.
· Worked with external APIs to create integrations for moving data in and out of our app.
· Lead project to allow for CSVs to be sent to Google Drive at scheduled intervals.
· Collaborated with database admins to tune SQL query performance.

Procore Technologies   August 2018 - August 2022
Software Engineer   *Carpinteria, CA*

· Developed software libraries for and indexing and searching data in Rails.
· Built out AWS infrastructure for customer-facing apps and internal tooling.
· Built data ingest pipelines using Kafka messaging queue and custom consumer groups.
· Created disaster recovery system for production Elasticsearch cluster.
· Primary maintainer for nox, an open source CLI for Elasticsearch operations.

Bowfin Consulting   February 2015 - July 2018
Software Developer   *Chicago, IL*

· Developed enterprise web applications for clients using Ruby on Rails, PHP, Java.
· Managed infrastructure for client projects using Linux servers and Heroku.
· Configured and developed CMS and CRM systems using Salesforce, Wordpress, and Drupal.
